CHAMIDU LAKSHAN

Software Engineer

+94 76 945 2840 | lakshanchamidu994@gmail.com | Colombo, Sri Lanka

Github | Linkdin | Portfolio

PROFILE SUMMARY

Motivated third-year Computer Science undergraduate with a strong foundation in mobile application development using Flutter for both Android and iOS platforms. Experienced in building responsive and user-friendly interfaces using Material Design and Cupertino widgets. Familiar with Firebase for authentication and backend services, Hive for local data storage, and Figma for translating UI/UX designs into functional applications. A detail-oriented problem solver with strong teamwork and time management skills, eager to contribute to innovative projects while continuously enhancing technical and practical expertise.

EDUCATION

BEng(Hons) Software Engineering — 2023 - Present

Informatics Institute of Technology associated with University of Westminster

First Year

- Software Development I - A
- Software Development II - B
- Trends In Computer Science - B
- Computer System Fundamentals - A
- Web Design And Development - A
- Mathematics For Computing - A

Second Year

- Object Oriented Programming - B
- Software Development Group Project - B
- Software Engineering Principals - A
- Database Systems - A
- Mobile app Development - B
- Algorithms and Theory Design - B

Foundation Certification Course — 2023

Informatics Institute of Technology

G.C.E Oridinary Level — 2020

Dharmasoka College, Ambalangoda

PROJECTS

Individual Projects

- Food Recipe App:- Developed a cross-platform mobile application using Flutter (Dart) that leverages on-device machine learning for intelligent recipe discovery. Implemented real-time ingredient detection through TensorFlow Lite integration, allowing users to identify ingredients via camera and receive instant recipe recommendations. Built with Firebase for authentication and cloud storage, integrated a Python FastAPI backend for recipe data management, and designed a modular architecture supporting Android, iOS, and Web platforms. The app features live camera streaming with ML inference, custom TFLite service implementation, and an intuitive user interface for seamless ingredient-to-recipe workflow.

  Technologies:- Flutter, Dart, Android SDK, IOS, Python, Fast API, Restful API, Firebase, GIT

- MovieApp-Room-OMDb is an Android application that allows users to search and view movie details using the OMDb API. The app integrates Room Database for offline data storage and caching, ensuring a smooth and responsive user experience even without an active internet connection. It demonstrates clean architecture, efficient API handling, and database synchronization.
  Technologies: Kotlin, MVVM, Room Database, OMDb API, Retrofit

- Smart Pomodoro App:- Developed a comprehensive Smart Pomodoro Timer mobile application using Flutter and the Pomodoro Technique to enhance productivity and time management. The app features a complete task management system with CRUD operations, real-time analytics dashboard, achievement-based gamification with XP progression, and a beautiful glass morphism UI design with dark mode support. Implemented local data persistence using Hive NoSQL database for tasks and user profiles, enabling offline-first functionality. The application includes advanced features such as customizable timer settings, priority-based task organization, weekly productivity charts, category breakdowns, and a comprehensive statistics tracking system that monitors completed sessions, streaks, and total focus hours.
  Technologies:- Flutter, Dart, GIT, HIVE (NoSQL local Database)

- MySLT App:- MySLT Mobile is a cross-platform mobile application developed using Flutter framework for Sri Lanka Telecom (SLT) services. This project enables SLT customers to manage their telecommunications services through a modern, user-friendly mobile interface available on both Android and iOS platforms.
  Technologies:- Flutter, Dart, Material Design, Cupertino, HTTP

EXPERIENCE

Sri Lanka Telecom

Lotus Road, Colombo 1, Sri Lanka
12/06/2025 - 12/ 12/ 2025

SKILLS

- **Mobile Development** - Kotlin, Flutter
- **Database** - HIVE, firebase, MongoDB, MySQL
- **UI Libraries** - Cupertino / Material Design
- **UI Design** - Figma
- **Version Controls** - GitHub, Bitbucket

ACHIVEMENTS

- Postman API fundamentals Student Expert (Postman)
- Programming Foundations: Version Control with Git(Linkedin Learning)

- Flutter Essential Training(Linkedin Learning)
- REST APIs (Linkedin Learning)
